FERNO®

When It's Critical®

Our Vision

Seeking innovation that drives our passion for superior emergency services.

Our Mission

Everyday, Ferno cares and listens to create a safer world for you.

Our Purpose

Seeking to be trusted advisors, by listening to understand your needs, inspires us to create and deliver valued solutions in premier EMS, Rescue, Fire, Police, and Mortuary services.

TABLE OF CONTENTS

Mondial® Transporter

The Mondial® has been designed with Ferno's Smart-Load™ system technology to make your job easier with smooth, simple, ergonomic operation of the transporter when loading and unloading from an ambulance, and when lifting or lowering the patient load at the scene.

Ì Reduce wrist strain and set body position before lifting or lowering the patient with the EZ Pull™ Release Handle

Ì Positive visual feedback when the legs are locked or unlocked using the leg lock indicator

Ì Provide additional safety on uneven surfaces with control-end wheel locks

Ì Loading-end swivel wheel locks

Ì Conforms to International Standards EN1865, EN1789

⊕FERNO®

1. **Smart-Load™ Auto-Release System,** featuring the loading-end leg automatic release mechanism and optional control-end leg automatic release mechanism, provides smooth, safe and easy loading and unloading.

2. **All-Metal Frame Construction** provides strength, long service life, and exceptional performance with patients up to 270 kg.

3. **Swivel-Lock Release Mechanism** provides maximum maneuverability in tight spaces.

4. **Large 150 mm Soft-Ride Wheels** with two wheel locks provide easy rolling over all terrains. In the Option 1 and 2 packages, two wheels are conductive with an antistatic feature.

**Color-Coded Controls and Automatic Leg Release** provides easy, intuitive operation.

Reflective Labeling provides nighttime visibility for added safety.

7. **Multiple Height Positions** provide easy patient transfer from different surface levels.

Mondial® Monobloc

The Mondial® Monobloc has been designed with Ferno's Smart-Load™ system technology to make your job easier with smooth, simple, ergonomic operation of the cot when loading and unloading from an ambulance, and when lifting or lowering the patient load at the scene.

Ì Reduce wrist strain and set body position before lifting or lowering the patient with the EZ Pull™ Release Handle

Ì Positive visual feedback when the legs are locked or unlocked using the leg lock indicator

Ì Easy patient transfer from different surface levels using multiple height positions

Ì Provide additional safety on uneven surfaces with control-end wheel locks

Ì Nighttime visibility on-scene with reflective labels

Ì Conforms to International Standards EN1865, EN1789

⊖FERNO®

1. **Smart-Load™ Auto-Release System,** featuring the loading-end leg automatic release mechanism and optional control-end leg automatic release mechanism, provides smooth, safe and easy loading and unloading.

2. **All-Metal Frame Construction** provides strength, long service life, and exceptional performance with patients up to 280 kg.

3. **Swivel-Lock Release Mechanism** provides maximum maneuverability in tight spaces.

4. **Large 150 mm Soft-Ride Wheels** with two wheel locks provide easy rolling over all terrains. In the Option 1 and 2 packages, two wheels are conductive with an antistatic feature.

5. **Side Lift Handles** allow additional operators to provide added lift assistance on heavy patient loads.

6. **Telescoping Handles** support optimal ergonomics for operators when lifting or moving the cot.

7. **Extending Headrest** to accommodate taller patients or an Airway Management Headrest that tilts down for optimal airway position for intubation (optional).

8. **Color-Coded Controls and Automatic Leg Release** provides easy, intuitive operation.

Model 28 Ferno-Flex™ Roll-In Chair Cot

The heavy-duty Model 28 Ferno-Flex™ Roll-In Chair Cot quickly converts to any of five positions for easy maneuvering in narrow hallways, elevators, and other confined spaces.

Ì Legs automatically lock in place when unloading cot
Ì Rectangular tubular aluminum construction
Ì Lubrication-free rotating components for easy movements
Ì Swing-down sidearms
Ì Two 127 mm (5 in.) stationary and two 127 mm (5 in.) swivel wheels
Ì Loading wheels provide easier loading and unloading
Ì Leg lock clip
Ì Black restraints and mattress available in orange or burgundy

FERNO®

1. **Versatile Patient Transport** with easy transition from cot to chair provides maneuverability and flexibility in challenging structural environments without the need to transfer patients to other carrying devices.

2. **Unparalleled Maneuverability** with 1140 mm length in chair position provides the shortest length of any cot in the market for working in confining areas such as tight hallways, small elevators, and narrow staircases.

3. **Lightest-Weight** roll-in style chair cot on the market at 30kg (67 lb), making it easier to operate.

4. **All-Metal Frame Construction** provides strength, long service life, and exceptional performance with heavy patients.

5. **Single Release** mechanism changes cot into one of five locked positions.

4. **All-Metal Frame Construction** provides strength and long service life.

6. **Adjustable Backrest** with eight positions from angles 0° to 75°.

1. **Versatile Patient Transport** with easy transition from cot to chair.

FERNO®

Complete Bariatric Solution with load frame handlebar, 454 kg load capacity in the lowest position, & optional LBS Bariatric Board (see page 54-57 for more bariatric solutions).

POWERFlexx®+ Powered Cot

The POWERFlexx®+ powered ambulance cot is capable of raising and lowering loads up to 318 kg (700 lb) at the touch of a button without operator assistance.

Ì X-Frame construction with rectangular tubing provides strength and durability
Ì Locked-on mattress provides easy patient transfer and security during roadside or aeromedical response
Ì Bed height range from 330 to 1040 mm (13 to 41 in.) with infinite range of adjustment
Ì Five-position, folding load frame and gas-assist backrest
Ì Adjustable lift bar at foot end
Ì Foot-end lead handle
Ì Cot can be operated manually if needed
Ì Four 150 mm (6 in.) swivel wheels
Ì US Voltage 110, International Voltage 220

FERNO®

1 **Five-Position Load Frame** and **Multi-Position Foot-End Lift Bar** reduce the cot length by 559 mm (22 in.) for movement in confined spaces, and provide true 360° turning radius in the lowest position.

2 **318 kg (700 lb) Lifting Capacity** raises the patient weight without lift assistance.

3 **All-Metal Frame Construction** provides strength, long service life, and exceptional performance with heavy patients.

4 **24 Volt DC POWERPac** with hydraulic actuator and dual-lifting cylinders provides smooth and reliable lifting.

6 **Reflective Labeling** provides nighttime visibility for added safety.

5 **Wide Thumb** Controls provide effective gripping and control from a variety of positions with or without gloves.

Model 35X PROFlexx® Cot

Ferno's 35X PROFlexx® X-frame ambulance cot provides industry-leading stability and safety. A longer, fixed front leg in the X-frame and carefully engineered geometry create a low center of gravity and minimal flex.

Ì Rigid C-channel and fixed front legs provide stability when rolling patient

Ì Locked-on mattress provides easy patient transfer and security during roadside or aeromedical response

Ì Built-in shock frame and foot-end lead handle

Ì 150 mm (6 in.) U-Tread wheels with two wheel locks

Ì Safety U-Bar and Hook to hold cot inside ambulance as undercarriage is lowered when unloading

Ì One-hand swing-down sidearms

Ì Gas-assist backrest

Ì Nine height positions and three loading heights

Ì Black mattress and restraints included

FERNO®

1 **Five-Position Load Frame** provides better leverage for lifting and lowering and accommodates movement in confined spaces.

2 **Wider Bed Surface and Head Frame** provide comfort and support for any size patient and extra elbow room during intubation and CPR.

3 **All-Metal Frame Construction** provides strength, long service life, and exceptional performance with heavy patients.

4 **Telescoping Side Lift Handles** provide extra lifting points for operators to lift heavy patients or ease navigation over rough terrain.

5 **EZ Pull™ Release System** reduces wrist strain and helps you position yourself before assuming the weight of the cot, maintaining optimum lifting posture.

Model 28Z PROFlexx® Chair Cot

The 28Z PROFlexx® Chair Cot provides maximum versatility in confined areas. The maneuverability and flexibility of transforming from cot to chair allows you to respond in confined spaces such as tight hallways, narrow staircases, and small elevators without transferring the patient. The 28Z's light weight, superior stability, and load capacity reduce situations that may cause injury to you or your patient.

Ì 3 positions with easy transition from cot to chair
Ì Lightweight roll-in style cot is only 31 kg (69 lb), making it easy to handle
Ì Locked-on mattress provides easy patient transfer and security during roadside or aeromedical response
Ì All-metal aluminum frame construction provides strength, long service life, and better performance with heavy patients
Ì Only 1220 mm (48 in.) length in chair position provides high maneuverability

Harrier® LT

The Harrier LT is a light-weight powered ambulance trolley, configurable to differing needs and requirements. Options include various handle options for improved maneuverability and a variety of accessories designed to improve the ease of use of the trolley, reducing manual handling injuries.

Ì Lightweight trolley, from 69 kg (152 lb)
Ì Excellent maneuverability, combining optimal low-friction wheels with ergonomic operator push-poles (optional accessory)
Ì Powered up/down lift operation, with slow start-stop movement, for complete patient comfort and operator safety
Ì Load capacity of 350 kg (772 lb) in raised position, 400 kg (882 lb) when in lowered position
Ì Simplified high-performance battery management. Uses a detachable rechargeable 28V 3A Milwaukee battery, 77 lifts from 1 single charge, recharge time of less than 1 hour
Ì IPC compliant, incorporating anti-microbial paint finish, use of Silver Biosafe harness restraints and an easy-to-clean 2-section, Anti-Bacterial Pressure-Relief mattress
Ì Reflective strips on top, base and X-frame rails, for increased visibility at night
Ì Compatible with Ferno Two Part Locking System

CCT Critical Care Trolley

The proven range of Ferno Critical Care Trolleys provide an instant patient treatment surface for transportation into a hospital. The trolleys have been tested and certified in a fully loaded simulation, in accordance with BS EN 1789:2007.

Features include:

Ì Backrest easily adjusted up to 75° via assisted lift

Ì Leg elevation and knee raise included as standard

Ì Two cylinder holders plus storage cabinet options available

Ì Single push/pull handle at foot end

Ì Removable four-point harness, plus two patient restraints

Ì IPC compliant, incorporating anti-microbial paint finish, use of Silver Biosafe harness restraints and an easy-to-clean 2-section, Anti-Bacterial Pressure-Relief mattress

Ì Dynamically tested to 10G in 6 directions

Ì Compatible with Ferno Two Part Locking System

Ì All CCT trolleys have the capability of securing a range of medical devices, and are configurable to specific customer's needs

Bariatric EZ Glide® from Ferno UK
More Information on Page 55

Model 59T EZ Glide® Stair Chair

The EZ Glide® Chair can be used as a stair chair, evacuation chair, and transport chair.

Ì Two rear tracks contact the lip of stairs allowing the tracks to glide over the edge of each step, eliminating the need to lift the chair and patient

Ì All-metal frame construction carries up to 227 kg (500 lb) to accommodate a wide range of patient sizes

Ì Two 100 mm (4 in.) front swivel wheels and two 150 mm (6 in.) rear wheels with locks do not collect debris and provide maneuverability in confined spaces such as stair landings

Ì Superior maneuverability in confined spaces and over carpet with 25.4 mm (1 in.) track-to-ground clearance and front swivel-wheels

Ì Five-position rear control bar (from 950 to 1613 mm / 37.5 to 63.5 in.)

Ì Five-position front telescoping handles (from 137 to 483 mm / 5.4 to 19 in.)

Ì Snap-on ABS plastic panels are easily removed for cleaning

Ì Extending footrest

Ì Available in red, blue, and platinum

EZ Glide with Restraints, Red ....#0731335
EZ Glide with Restraints, Blue ....#0731338
EZ Glide with Restraints, Platinum ....#0731339

Accessories: Page 40, 42

1 Extending Footrest and lower track angle increase patient sense of security.

2 Folding Design provides compact storage.

3 5-Position Rear Lift Bar and front telescoping handles reduce the strain of lifting and provide maximum control for operators of various heights.

FERNO®

1 **Easy-to-Use Paddle Style Controls** are intuitive and provide easy operation when climbing or descending stairs.

EZ Glide® with PowerTraxx® Stair Chair

Ì Assists patient loads up to 227 kg up and down stairs without carrying or lifting

Ì The motor and track system carry the weight, reducing fatigue and the chance for injury

Ì Provides maximum safety when going up and down stairs, using an electronically controlled motor and direct drive transmission

Ì Fast climbs and descents using a variable-speed system

Ì Easily stop, climb, or descend stairs with just a push of a paddle button

Ì Maximum performance on every call with intelligent microprocessor electronics

Ì Superior maneuverability in confined spaces and over carpet with 25.4 mm (1 in.) track-to-ground clearance and front swivel-wheels

Ì Full control of operation with a manual override that allows medics to use in unpowered mode

Ì Smooth 100 mm (4 in.) front swivel wheels and 150 mm (6 in.) rear wheels do not collect debris and provide maneuverability in confined spaces such as stair landings

2 **Motor** and **Direct Drive** transmission provide maximum safety on stairs.

3 **Rechargeable Lithium-Ion Battery** is easy to remove. *#0832198*

LBS Series Bariatric Boards

Ferno® LBS (Large Body Surface) Bariatric Boards allow you to adapt standard Ferno cots while on-scene to bariatric cots to safely transfer and transport bariatric patients. The LBS and LBS Junior Bariatric Boards attach quickly and easily to a Ferno cot, and fold for easy storage when not in use. Compatible with Models 35X, 93H and POWERFlexx® cots.

(Existing fastening system installations may not allow the LBS to fit inside the ambulance)

LBS Bariatric Board

Ì Quickly attaches to the Ferno® 35X, 93H and POWERFlexx® ambulance cots
Ì Maximum width: 860 mm (33¾ in.)
Ì Includes Manta™ Transfer Sheet
Ì Includes one set of restraint extenders and mounting blocks

LBS Bariatric Board, for POWERFlexx® and 35X ....#0822057
LBS Bariatric Board, for 93H..#0819991

LBS Junior Bariatric Board

Ì Quickly attaches to the Ferno® 35X, 93H and POWERFlexx® ambulance cots
Ì Features folding "wings" for better maneuverability through doorways
Ì Maximum width: 1040 mm (41 in.), Minimum width: 740 mm (29 in.)
Ì Includes Manta™ Transfer Sheet
Ì Includes one set of restraint extenders and mounting blocks

LBS Junior, for 35X and POWERFlexx®...#0822184
LBS Junior, for 93H...#0821936

LBS Mattress

Ì Provides added patient comfort
Ì Folds away for easy storage
Ì LBS: 1778 x 914 x 51 mm (571.5 mm wide at head end)
Ì LBS Jr.: 1778 x 698.5 x 51 mm (597 mm wide at head end)

FERNO®

Scoop EXL™ Stretcher

Ferno's Scoop EXL™ Stretcher provides superior comfort and safety to patients who require spinal immobilization. The Scoop EXL eliminates the need for log-roll maneuvers, significantly decreasing movement of the cervical spine.

Ì Uncouples at both ends of the stretcher to gently scoop up the patient, or uncouple only one end to use a scissor-type closing motion

Ì Oval profile and angled handles provide ergonomic ease of use

Ì Twin Safety Lock® mechanism provides smooth locking and unlocking

Ì Head section is recessed for proper cervical alignment

Ì Easy-to clean surface is impervious to fluids

Ì X-ray translucent

Ì Folded length is 1194 mm (47 in.) for compact storage

Ì Available with or without pins

1. **Thermally-treated Polymer Construction** does not get too hot or cold, keeping the patient more comfortable.

2. **Adjustable Length** accommodates patients of multiple heights.

3. **Narrow Foot-end Frame** improves handling in confined areas.

4. **Optional Speed-Clip Pins** allow fast attachment or rearrangement of restraints.

**Twin Safety Lock®
Mechanism** at each end allows either or both ends to separate.

Model 445 Universal Head Immobilizer

Ì Composed of two plastic-coated, closed-cell foam head supports, one universal attachment base and two durable head straps

Ì Head supports can be used on standard backboards, or turned around for use on the Scoop™ Stretcher

Ì Head strap is designed to conform to the patient's forehead

Ì Large side openings for monitoring the patient's ear canal

Ì Minimal interference with X-ray, MRI, or CT scan procedures

Ì Waterproof coating makes it easy to clean and prevents bacterial growth within components

Ì Will not absorb blood or bodily fluids and is easy to sanitize

Ì Compatible with Scoop™ stretchers and Ferno backboards (except NAJO® Sports Board)

Ì Meets FMVSS 302 flammability rating

Model 445 Universal Head Immobilizer..#0313855

CHI - Combi Head Immobilizer

Ì Uniquely designed base-pad and strapping system provide optimum fitting on all backboards and Scoop™ stretchers

Ì Fully infection control compliant, using antimicrobial Velcro and PU molded head blocks that contain antibacterial additives throughout

Ì Accidental surface damage to head blocks does not affect integrity of product and can still be reused, unlike dipped or disposable head blocks

Ì Compact in design and can be stored while on a backboard or separately in a cabinet

Ì Modular design allows replacement of individual parts

Ì X-ray translucent and MRI compatible

Ì Easy to apply

Germa EasyFix Vacuum Mattress

The EasyFix Vacuum Mattress features a new body shape design to optimize the vacuum mattress capabilities. Folds easily and requires 20% less storage space than the Germa All-In-One Vacuum Mattresses. EasyFix's unique construction delivers improved immobilization of the upper back, neck and head by a reinforced base plate that covers all of the cervical spine. This together with the x-designed restraint system supports the patient and creates the most effective immobilization.

Ì Reinforced base plate covers the head, neck and upper back for improved immobilization of the cervical spine
Ì One-piece back support is X-ray translucent
Ì New chamber technology allows for quick and easy preparation and ensures the granulate is evenly dispersed for optimal immobilization
Ì 10 reinforced carry handles with ergonomic grip
Ì Compliant to EN 1789 and 1865
Ì Carry capacity of 250 kg (551 lb)
Ì Lightweight and fold easily for compact storage
Ì Available as Ready2GoKit including: Full body mattress + five-color-coded restraints + repair kit + aluminum vacuum foot pump + bag

Plano® 747-M Trauma Box

Ì Features a drop-front panel, three trays that pull out like drawers or which can be accessed from the top like conventional boxes, and a deep box for larger items

Ì Suited for use as either a drug or trauma kit

Ì Built to last with rugged handle, solid brass hardware, ABS latches and durable padlock eyes

Ì Dimensions (L, W, H): 324x517x292 mm (12.75x20.375x11.5 in.)

Plano® 747-M Trauma Box .... #0831900

Saver First Aid Kits

Saver First Aid Boxes are not a re-badged fishing or toolbox but a purpose-designed medical box for first aid use. Each box comes standard with a locking feature, making the kits tamper-proof if desired.

Each box has an over-center catch and a tongue and groove seal, which provides a tighter seal of the box, making them resistant to dust and water. Another unique feature is the set of removable dividers in the white trays, which allow you to customize each compartment. The trays also have a generous depth for greater storage and a smooth surface for easy cleaning.

Saver First Aid Kit .... #FAF1672G
Dimensions (L,W,D): 320x185x140 mm (12.5x7.25x5.5 in.)

Saver First Aid Kit .... #FAF1772G

Model 205, 206, 210, 211 'DD'-Lite® & 'EE'-Lite® Carbon Fiber O₂ Bottles

Fully wrapped, carbon-fiber reinforced, aluminum-lined vessels manufactured with the highest-grade aerospace materials. Both products carry DOT regulatory certifications for design and qualification certifications. The 'DD'-Lite® and 'EE'-Lite® can be mounted to a Ferno 35A+, 93H, 35X, or 93-EX Squadmate™ cots and can also be mounted to the back of an EMS bicycle. The significant reduction in weight and greater capacity of these carbon-fiber vessels means you can carry more oxygen to remote locations, onboard helicopters, up flights of stairs, and in your ambulance.

	'DD'-Lite®	'EE'-Lite®

Emergency Respiratory System

Ì Provides resuscitation, gas-powered suction and oxygen therapy in a lightweight package

Ì Configured using the ERC (Emergency Respiratory Case)

Ì Made from 600 Denier Cordura

Ì Can be carried like a backpack or like a bag

Ì Shoulder straps and waist belt can be tucked away

System includes:

Ì ERC Case

Ì Uni-Body brass regulator (0-25 lpm) with constant flow and two high-flow outlets

Ì Demand valve with 1.8m/6 ft. hose

Ì Single patient mask

Ì Cuffed mask

Ì Gas powered aspirator one "D" size aluminum oxygen cylinder (415 liters/02) or one "EE"-Lite carbon fiber oxygen vessel with a capacity of 1377 liters of oxygen

ERS with "EE"-Lite Carbon Fiber Tank .... Call for Specifications
ERC BackPack Only .... #0819634

SAR BackPack Portable

Ì Designed for urban search and rescue and remote wilderness rescue

Ì Has a technical frame back panel, two internal 6063 aluminum stays, contoured shoulder straps, side compression and load lifting straps

Ì Built for proper distribution of the load

Ì Integrated nylon rain cover with storage pocket

Ì Large volume main compartment holds "D", Jumbo "D", or "DD-Lite" cylinder

Ì First aid cross is reflective for nighttime visibility

Ì Padded and breathable mesh shoulder straps w/ hydration tube clip

Spartan Split-Apart Basket Stretcher

The fully stainless steel frame has a 2500 lb (1100 kg) strength rating while providing a completely smooth sliding surface on the bottom to handle rough terrain. The outer high density polyethylene (HMWPE) shell is securely attached to the middle rail leaving the top rail completely exposed to provide unencumbered access for multiple rescuers to grab the rail at any location. This eliminates the need for rescuers to find hand cutouts and makes the rail easy to grasp even while wearing thick gloves.

Ì Split-apart feature with LocSafe™ connectors provide fail-safe connection and allows the stretcher to be assembled in about 15 seconds

Ì StratLoad™ attachment points provide secure bridle attachment with any size carabiner

FERNO®

Traverse Rescue® Stretcher (TRS)

Ì Designed and constructed for both horizontal and vertical casualty evacuations

Ì Lightweight and compact design makes it ideal for high angle, confined space, back country and helicopter rescue operations

Ì Wrap-around concept helps protect arms and sides from injury during evacuation procedures and gives patient a sense of security

Ì Inner layer made from a tough high-density polyethylene sheet, which gives the stretcher its rigidity when curved around the patient

Ì Base fabric of outer shell is made of 1350 Denier Cordura® nylon with heavy polyurethane coating, and is specially-woven for maximum cut and abrasion resistance

Ì Top layer of outer shell is made from 1000 Denier Cordura® nylon making it tough but comfortable for patient to lay on

Ì Carry handles and vertical lift attachment points are made from 51 mm (2 in.) webbing and are designed as structural attachment points for a lifting bridle

Ì Plastic tubing on the carry handle provides a much more comfortable hold for rescuers

Ì Built-in, color-coded, full body adjustable harness restrains the patient securely in the stretcher

Ì Padded straps in the shoulder and groin areas provide a comfortable fit, and the foot strap prevents the patient from sliding down during vertical lifts

Ì Six, 2" outer-web restraint straps secure the patient into the stretcher by wrapping the stretcher around the patient's body using a 2-bar, 3-bar steel buckle system which is fast and easy to work with, even with gloves on

Ì Includes a Cordura® storage bag with backpack shoulder straps

Ì Accessories sold separately

Traverse Rescue® Litter Bridle

Ì Litter bridles intended for use with any style litter
Ì Hardware meets NFPA and military specifications
Ì "O" ring for top tie-in point is rated 134 kN (30,000 lb)
Ì Parachute buckles allow independent adjustment to set the best basket angle for patient comfort
Ì Rated strength for bridle is 22kN (5,000 lb) / 2,268 kg

Hard Eye Litter Bridle .... #0313897
Soft Eye Litter Bridle .... #0313898

Large Steel Carabiner

Ì Large swing gate opening with screw lock closure
Ì High tensile steel
Ì 40 kN / 8992 lb rating
Ì Meets ANSI Z359.1-2007 / Z359.12-2009

Large Steel Carabiner .... #0822420

FERNO®

Ferno® FDU

Ideal for personal rescue, emergency escape, rescue operations or specialized rope work as a friction control, double stop descending system. The system gradually releases its load when the handle is moved towards the central position. The double stop mode locks should a panic grab happen but unlocks progressively when the handle is released. The Ferno FDU is available with a friction rack for rescue loads (2 persons). Extensively tested and certified to AS/NZS 4488.1:1997 with 11 mm rope.

FDU100 with Friction Rack .... #FWE-FDU100
FDU200 without Friction Rack .... #FWE-FDU200

Ferno® Mini Haul Kit

Ì Extremely compact haul kit
Ì Provides a 6:1 mechanical advantage
Ì Features a V-shaped cleat that if required, enables the operator to lock off the system during a hauling operation
Ì Rated for one person rescue only

Ferno Mini Haul Kit .... #VKIT MINI HAUL

Res-Q-Link Recovery Pole

The Res-Q-Link is a unique and multi functional rescue pole incorporating many features and benefits including:
Ì Large alloy double-action hook compatible with most recovery systems and allows two configurations to provide versatility when rescuing a fall victim
Ì Extendable from 150 cm to 280 cm (59 to 110 in.)
Ì Fiberglass outer pole and rubber-coated handle for maximum grip and control in long reach scenarios
Ì Flashlight holder for low light scenarios which is compatible with most slim line flashlights
Ì Rope and web cutting knife to cut victim free once a recovery system is attached
Ì Additional double action hook available (Code VCT L3536201)

Res-Q-Link Recovery Pole .... #FWE2090

Spreader Bar

Ì Used in confined space situations and rescue scenarios
Ì Attaches to confined space pick up points on harness shoulder straps
Ì AS/NZS 1891.1:2007 approved

Spreader Bar .... #VAI SPREADER SHA

FERNO®

IndustriPOD®

The IndustriPOD® is a rugged and versatile tripod with built in safety factors that exceeds internationally recognized rescue systems and standards. Its simplistic but unique design makes it ideal for heavy duty confined space requirement where guaranteed performance is mandatory.

The IndustriPOD's® design allows for a 550 kg load (tested to 5500 kg) off the centre eyebolt and 360 kg loads (tested to 3600 kg) off the side plate attachment points making it one of the strongest tripods on the market.

Ì Rectangular, fully adjustable legs with quick action lock leg pins
Ì One-piece fabricated steel head
Ì Adjustable foot with aggressive non-slip tread pattern
Ì One swivel eyebolt
Ì Three carabiner attachment points
Ì Three tie off points for rigging or stabilization

IndustriPOD® ....#FWE-INPOD

Arachnipod

The Ferno Arachnipod is the world's most versatile modular total edge management system (TEMS). Components can be added or removed to suit structural or natural features. The unique design of the patent pending modular head allows the Arachnipod to be constructed into many configurations including a ginpole/monopole, bipod, tripod, quadpod, bridge system and handrail recovery monopole. Its versatility makes it an ideal system for workers in industries such as rescue and emergency services, construction, military, utility services, mining, film and maintenance. Approved to CE Standard EN 795B.

The Arachnipod, in its basic form, is a simple tripod with the three legs independently pivoting from an anodized aluminium head. The modular head has a similar design to a door hinge. Inserting or removing a pin through the centre of the head allows the quick and simple addition or removal of components to create a configuration to suit any edge management scenario. Each head section contains a shackle for guying while an optional in-built twin grooved stainless steel pulley is also available.

The Arachnipod flat packs for simple and convenient storage and the modular design provides an option to purchase a basic unit and upgrade components to make a more advanced system. There are numerous kits available ranging from the basic tripod through to a total edge management system (TEMS). The table opposite will help you decide which kit is best for your specific needs.

FERNO®

Traverse RDC

Swiftwater rescue is safe and sure with Traverse's RDC Rapid Deployment Craft inflatable rescue raft. The RDC allows a rescuer or rescue team to quickly reach a victim and safely retrieve them in swift water, whitewater, floods or low head dam entrapment situations.

The RDC is easy to control, very stable and is self-righting in potential overturn situations. It paddles and ferries like a canoe and is suitable for class or grade 5 whitewater. Where swiftwater rescue situations permit, the RDC can be shore controlled by tethers from one or two rescuers. Or, it can be easily paddled by one or two rescue technicians.

Ì The RDC stores deflated in a 2 foot cube
Ì Will fit in the trunk of almost any passenger car
Ì Inflates in seconds
Ì Weighs 50 pounds and can be easily carried by one person
Ì Can be launched without access to a boat ramp
Ì Can be on the scene and in action in seconds
Ì 5 Year Manufacturer Warranty

Traverse RDC...Contact Traverse Rescue

Rescue Boat Sea Scoopa

The Sea Scoopa is designed for the rescue/retrieval of a man overboard (MOB) in a horizontal or vertical floating position. Its unique design enables the crew to complete the rescue operation without entering the water.

The Sea Scoopa net prevents the MOB being swept out the aft end and has no large openings which can lead to limb entrapment or risk of drowning in difficult conditions. The scoop encloses and conforms to the whole body and minimizes the risk of MOB falling out during lifting. The two poles enables the mouth of the net to be widened to maximize capture surface and gives rescuers extra reach, better control and visibility during the rescue process.

Strategic handle placements assists lifting the MOB in a horizontal position and the 2:1 mechanical advantage reduces the lift load by 50%. The Sea Scoopa includes an integral stretcher that clips on to the rescuers' safety harness allowing the MOB to be stretchered immediately after water retrieval without further handling or need for separate stretcher personnel.

Sea Scoopa...VRES SEACOOP
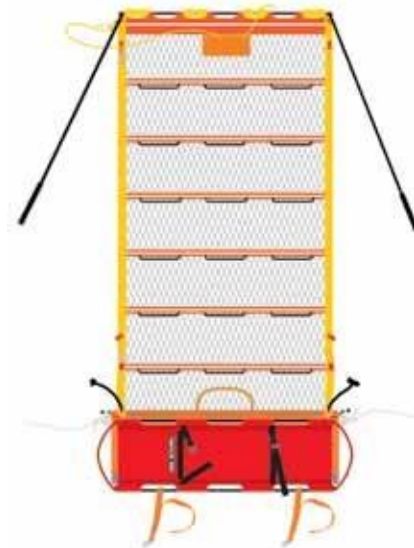

Saver Model S-219 Cot

Ì The Saver Model S-219 combines easy handling with improved patient comfort.

Ì Backrest can be locked in one of six positions, from 0 to 76 degrees

Ì Swivel wheels provide smooth, swift movement in any direction

Ì Wheel locks on two wheels provide added safety

Ì Includes mattress and restraints

Side Extension Panels (SEP)

The SEP provides a new dimension to the operating table. Each sturdy extension panel may be attached to any existing Ferno operating table to expand the surface allowing the embalmer to work on larger bodies. Another key feature of this extension panel is the ability to be used as a splash guard for general washing. The panels can be used on one or both sides of the operating table providing the embalmer increased flexibility. These features, along with the ability to easily install, remove, clean and store the SEP, provide the embalmer the opportunity to customize the table based upon individual needs.

Ì Stainless steel panel
Ì Fastens to any Ferno embalming table
Ì Easy to clean
Ì Storage bracket available for Model 101-H or Model 103

Table sold separately

Flexible Body Fridge

The Flexible Body Fridge provides a quick, cost-effective and practical solution for temporary or permanent cold storage without having to make building modifications. The system uses a unique track and roller system for easy installation and a two-way thermal curtain to keep the cold air in and the ambient air out.

Ì Versatile system allows simple assembly, extension and relocation
Ì Fully operational within minutes of installation
Ì Suitable to divide larger cold rooms
Ì Bespoke designs to suit any size room
Ì Cold lock skirt adjusts to uneven floors
Ì Strong, lightweight curtains are simple to clean and repair

Compact Body Fridge

The Compact Body Fridge provides an easy solution for temporary cold storage. With a simple, modular design, the freestanding unit provides compact and dependable temporary refrigeration in any indoor or outdoor location – even when access is severely limited.

Ì Instant, cost-effective cold rooms for all locations
Ì Installed by two operatives within 15-20 minutes
Ì Individual chiller unit on sturdy wheeled base
Ì Fast refrigeration – just plug the chiller unit into a 13 amp supply or a suitable generator
Ì Can be supplied with storm straps, pegs and tie for secure outdoor use
